

## MSC 28x9.2

### Specification

|                         |                          |                                                                          |               |
|-------------------------|--------------------------|--------------------------------------------------------------------------|---------------|
| Model                   | MSC 28x9.2               | Weight                                                                   | 85 g          |
| Material of Props       | Carbon fiber+Epoxy resin | Surface technics                                                         | Bright mirror |
| Storage temperature     | -10°C~35 °C              | Operating Temperature                                                    | -40°C~65 °C   |
| Recommended speed range | 1600~3800 RPM            | Storage humidness                                                        | ≤85 %         |
| Ultimate tension        | 27.5 kg                  | Recommended thrust                                                       | 5.5~10.5 kg   |
| Folding/unfolding       | unfolding                | Recommended motors of hobbywing<br>M8108 / M8110 / V8014 / V8017 / V9616 |               |

### Dimension Figure

## Speed, thrust and torque test data
