

## MFP 18x6.0

### 技术参数 Specification

|                                   |                                              |                                                          |                       |
|-----------------------------------|----------------------------------------------|----------------------------------------------------------|-----------------------|
| 产品型号<br>Model                     | MFP 18x6.0                                   | 单支重量 (含桨夹)<br>Total weight (Including propeller adapter) | 39±3 g                |
| 主要材质<br>Material of blade         | 碳纤维增强尼龙复合材料<br>Carbon fiber reinforced nylon | 表面工艺<br>Surface technics                                 | 哑光晒纹<br>Matte texture |
| 桨夹材质<br>Material of Props adapter | 铝合金<br>Aluminium alloy                       | 使用环境温度<br>Operating temperature                          | -20°C~50°C            |
| 存储温度<br>Storage temperature       | -10°C~35°C                                   | 存储湿度<br>Storage humidness                                | ≤85 %                 |
| 最佳转速范围<br>Recommended RPM range   | 3100~6300 RPM                                | 常用拉力范围<br>Recommended thrust                             | 1.0~4.5 kg            |
| 最大转速<br>Max RPM                   | 7650 RPM                                     | 极限拉力<br>Max thrust                                       | 6.6 kg                |
| 直桨/折叠桨<br>Non-folding/Folding     | 折叠桨<br>Folding propeller                     | 推荐搭配电机<br>Recommended motors of HOBBYWING                | M6208 / X6 SE         |
